SUMMARY

Enthusiastic and goal-driven MCA graduate seeking an entry-level position to apply academic knowledge in a practical environment. Known for being dependable, organized, and eager to contribute to team efforts with a strong work ethic and positive attitude. Looking to grow within a forward-thinking organization while supporting its goals through continuous learning and dedication.

PROJECTS

Cafe Management System

April 2025-May 2025

- Technologies Used: HTML, CSS, JavaScript, Django
- Developed a full-stack Café Management System web application using Django, HTML, CSS, JavaScript, and SQLite as part of an academic/personal project. The system includes features such as user registration and login, menu browsing, add-to-cart functionality, order placement, and order tracking.
- The project followed the MVC architecture, with Django handling the backend logic and SQLite managing data storage. This project helped strengthen my skills in web development, building responsive user interfaces using Bootstrap.

Personal Portfolio

Mar 2025-April 2025

- Technologies Used: HTML, CSS, JavaScript
 - Designed and developed a responsive personal portfolio website to showcase my skills, projects, and contact information. The website includes a clean and user-friendly interface with smooth navigation. HTML was used for structuring content, CSS for styling and layout, and JavaScript for interactive features such as dynamic form validation and animated scrolling. The portfolio is optimized for both desktop and mobile devices, demonstrating my front-end development capabilities and design sense.
-

EDUCATION

Master of Computer Application

Sep 2023 - May 2025

College of It and Management Education

- Specialization in Computer Application.

Bachelor of Science

July 2018 - May 2021
